

Urgent Notice

Responsibility of Sharing Promotional Materials That Ensures Compliance with the Medicine Act

Nefful Taiwan recently received a notice from the Taiwan Fair Trade Commission that served as a reminder to all independent distributors to ensure that sales tactics used and promotional materials must not contain any product description, claims or illustrations which are deceptive or misleading. This effort must be in place to protect consumers from fraudulent products and false product claims related to Covid-19. Offenders violating the regulations may be subjected to penalties imposed by the Commission.

There are currently no approved medical countermeasures against Covid-19, hence any product descriptions or product claims that are associated to Covid-19 or other viral infections will be deemed as violation of regulations.

We appreciate all partners of Nefful International to take note of the abovementioned information. Thank you for your cooperation.
