# WELLNESS ON POINT

## NI'S GUIDE TO COMPREHENSIVE WELLNESS

In today's fast-changing world, mounting issues like climate change, pollution, food safety concerns, and misleading health information can easily cause anxiety and helplessness.

At the core of these issues is one key topic: **Health**. In response, we are organizing this seminar and have invited a professional physician to guide us in understanding the health challenges faced by modern individuals, and to share how we can make informed decisions in daily wellness and self-care, building our own health resilience. The talk will cover essential health concepts, clothing care tips, and practical nutrition advice, guiding us from personal health awareness to caring for our families as well.

This is a rare chance to recharge your health knowledge. Special offers await on the event day! Don't miss out! Join us and become a guide to better health for yourself and your loved ones.
