A NEW PERSPECTIVE ON WELLNESS • UNLOCK YOUR HEALTHIER FUTURE WITH NI

As the focus of health shifts from simply pursuing a longer lifespan to placing greater emphasis on healthspan, health is no longer just a part of daily life, it has become a key factor that shapes our quality of life and future well-being. The World Health Organization (WHO) has introduced the "Decade of Healthy Ageing" initiative, alongside ongoing developments in health research, encouraging people to develop sound health management practices in their everyday lives. By adopting a more proactive approach to health at every stage of life, individuals can enjoy a higher quality of life and a more fulfilling future. To help our partners stay informed about the latest health insights in 2026, Nefful International has specially invited a physician to share new perspectives on healthspan, while exploring topics such as health management, quality of life, daily routines, and life balance. Together, we aim to inspire everyone to integrate healthy living into their everyday lives and build a healthier, more rewarding future.

Good health begins with the right mindset, and a better life starts with everyday habits. We sincerely invite you to join this health seminar to gain the latest health insights, embrace healthy living as part of your daily life, and build a healthier, higher-quality future together with your family.
